

GCI PARTNER PROFILE: Streamline Automation

GlasCraft's Powerful Sales & Service Network

"There is a saying: you are only as strong as your weakest link. So we are very selective in the choice of our supply partners. As the leader in automating the fabrication of 3D objects via foamcutting and custom milling, we were looking for a partner that could live up to not only our standards but also the standards of our clients.

GlasCraft Probler P2 gun in use on a Streamline design

Providing a turnkey solution means we consult on, sell, train on, and maintain many pieces of equipment for clients across North America and around the world. We have a lot of moving parts that are geographically dispersed and as a result, quality, dependability and consistency are absolutely crucial for us to be successful.

In the 5 years that we have been working with GlasCraft we have been very pleased with a quality product, shipped in a timely manner, with a good design and high performance, and best of all, long-lasting reliability.

A Strong Partner

We also use GlasCraft's comprehensive machine and spray gun offerings as part of our ongoing research and development efforts. We can't afford to have a weak link and in GlasCraft we have strong supply partner."
